three.ws

A sentence or a photo in. A rigged 3D agent that speaks, out.

three.ws is an open-source (Apache-2.0) platform that generates textured 3D models and avatars, rigs them for animation, gives them a voice and a persona, and ships them to any web page, intranet or app with one HTML tag: `<agent-3d>`.

three.ws and Microsoft have announced a partnership, and three.ws is live on Microsoft Marketplace.

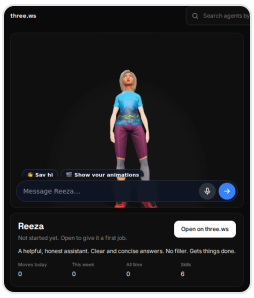

54,356	29,443	4,936	655	16	276
3D models generated on three.ws	models finished by TRELLIS on our GPUs since July 2026	agents created	live embeds on other sites	tools on the free MCP server	GitHub stars, Apache-2.0

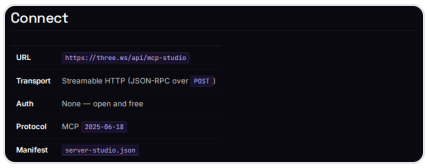

MICROSOFT TECHNOLOGY IN PRODUCTION

Running for real users today, under each project's own license.

- **Microsoft Marketplace** LIVE
  Publisher listing at marketplace.microsoft.com. Same platform as three.ws; nothing forks for the channel.
- **TRELLIS, Microsoft Research (MIT)** LIVE
  Self-hosted image-to-3D on NVIDIA L4 GPUs in Google Cloud. 35,531 jobs since 8 July 2026; 30-day median 234 s at standard quality. TRELLIS.2 worker deployed, not yet serving.
- **ONNX Runtime Web** LIVE
  Wake word, voice activity detection and transcription run in the visitor's browser, so listening never streams a room to a server.
- **Adaptive Cards 1.6** LIVE
  One agent card layout for chat hosts and the Windows widgets board.

Agent tab, built for Teams

Free MCP server: no account, no key

BUILT FOR MICROSOFT SURFACES

In the open-source repo, validated by automated checks, each awaiting its publication step.

- **App package for Teams and Microsoft 365** READY
  Two personal tabs, a search message extension with Adaptive Card results, and an agent connector to the 16-tool MCP server. Manifest schema v1.30; package checks pass.
- **MCP server for Copilot Studio and Foundry** READY
  Streamable HTTP endpoint any MCP client can add today; certification package drafted.
- **Power Platform connector** READY
  Five actions for Power Automate, Power Apps, Logic Apps and Copilot Studio, OAuth with PKCE, four flow templates.
- **Microsoft 365 Copilot connector** READY
  Indexes an account's agents, models and avatars into the customer's tenant through Microsoft Graph, with per-audience ACLs.
- **Marketplace SaaS offer** READY
  Microsoft Entra sign-in, SaaS Fulfillment v2 and hourly metered billing, so a Marketplace purchase grants the same plan as a card.
- **Microsoft Store and Edge Add-ons** READY
  The installable web app packaged as MSIX, and the browser extension.
